marcello.martinez@unicampania.it

Alessio Maria Braccini, Università degli Studi della Tuscia, abraccini@unitus.it

Tentative schedule

Invited papers submission open	March 1 st
Revised paper submission deadline	April 15 th
Pre-print for authors proof-read	May 30 th
Book published	End of the year 2020

About LNISO

Lecture Notes in Information Systems and Organization — LNISO — is a series of scientific books that explore the current scenario of information systems, in particular IS and organization. The focus on the relationship between IT, IS and organization is the common thread of this collection, which aspires to provide scholars across the world with a point of reference and comparison in the study and research of information systems and organization. LNISO is the publication forum for the community of scholars investigating behavioural and design aspects of IS and organization. The series offers an integrated publication platform for high-quality conferences, symposia and workshops in this field. Materials are published upon a strictly controlled double blind peer review evaluation made by selected reviewers.

Series Editors: Spagnoletti, P., De Marco, M., Pouloudi, N., Te'eni, D., vom Brocke, J., Winter, R., Baskerville, R.

ISSN: 2195-4968

Publisher: Springer Verlag

LNISO volumes are abstracted/indexed in Scopus.

LNISO currently published 34 books in the series
